## **Contents**

1 Introduction to C		6.6 printf(): Details	43	11 Overloading: function & Operators. Inheri	tance.
1.1 The components of a C program	1	6.7 scanf(): Details	45	11.1 Introduction to INHERITANCE	85
1.2 DECLARE VARIABLES AND ASSIGN	3	6.8 STREAMS for file I/O in C	46	11.2 Intro to FRIEND functions	85
VALUES		6.9 File access using fopen(), fclose() and	47	11.3 Overloading CONSTRUCTOR	87
1.3 Properties of function and C keywords	5	read/write using fgetc(), fputc()		11.4 COPY CONSTRUCTOR (recall 10.10)	88
1.4 USE FUNCTIONS TO RETURN VALUES	6	6.10 End of file [EOF] feof() And file error	50	11.5 Default arguments	89
1.5 Arguments of functions and their use	7 7	checking ferror() 6.11 String I/O in a File with fputs() & fgets().	50	11.6 Ambiguity Caused By Overloading	89
1.6 REMEMBER THE C KEYWORDS	,	Text I/O with fprintf() & fscanf()	30	11.7 Address of an OVERLOADED function (recall 5.8)	90
		6.12 READ AND WRITE BINARY DATA	51	11.8 Overloading MEMBER OPERATOR	90
2 C Control Statements		6.13 Random access using fseek()	52	FUNCTIONS	
2.1 The Block of statements or Code Bolcks	8	6.14 Some other important File-System	53	11.9 Overloading Binary Operators	91
2.2 The Selection statements	8	functions		11.10 Overloading the RELATIONAL and	92
2.3 The "if" statement	8	6.15 THE STANDARD STREAMS	53	LOGICAL operators	
2.4 The "if-else" statement	8			11.11 Overloading A UNARY Operator	93
2.5 The "for" loop	9			11.12 Overloading FRIEND OPERATOR	93
2.6 The increment operator "++" and	9	7 Custom (User-defined) data-types & Advance	ea	FUNCTIONS	0.4
decrement operator ""	10	Operators 7.1 The Custom (Heavidefined) Pate types of	F.4	11.13 Assignment Operator Advanced 11.14 Overloading The [ ] SUBSCRIPT	94 95
2.7 The backslash charecters \n "newline", \t "tab" etc	10	7.1 The Custom (User-defined) Data-types of C	54	Operator	93
2.8 RELATIONAL AND LOGICAL OPERATORS	10	7.2 STRUCTURE Basics	54	11.15 INHERITANCE: access control of base	96
NOTE: Execution of printf with ++ operators	11	7.2.1 Defining structures	54	class	
2.9 Character inputs from keyboard	11	7.2.2 Declaring structure variables :	55	11.16 Accessing PROTECTED members	97
2.10 NEST if statements and if-else-if	11	7.2.3 Structure variable initialization :	56	11.17 INHERITANCE with Constructors-	97
LADDER		7.2.4 Accessing members of a structure & use	56	Destructors	
2.11 for Loop – 'Advanced'	13	of "." operator		11.18 MULTIPLE INHERITANCE	99
2.12 while Loop	13	7.2.5 Structures as arrays :	57	11.19 VIRTUAL BASE (problems with "one	100
2.13 do Loop	14	7.2.6 Arrays within Structures : 7.2.7 COPYING AND COMPARING	57 57	derived" & "multiple direct base")	
2.14 NESTED LOOPS 2.15 Use break TO EXIT A LOOP	14 15	7.2.7 COPYING AND COMPARING STRUCTURE VARIABLES	57		
2.16 Use continue for skipping any code	15	7.2.8 Structures and Functions	57	12 C++ I/O system	
2.17 The switch STATEMENT	16	7.2.9 SIZE OF STRUCTURES	59	12.1 C++ I/O Stream	101
2.18 The goto STATEMENT	16	7.2.10 Declare Pointer to Structure	59	12.2 Formatted I/O	101
2.19 C control statements	17	7.2.11 NESTED STRUCTURES	60	12.3 width(), precision(), AND fill()	103
		7.3 BIT FIELDS	60	12.4 I/O MANIPULATORS	103
		7.4 UNIONS	62	12.5 Inserters and Extractors	104
3 Advanced data types, variables &		7.4.1 Difference between structure and union	62	12.6 User Defined Manipulators	105
Expression		7.4.2 Assigning values to union members	63	12.7 File I/O	106
3.1 DATA - TYPE MODIFIERS	18	7.5 ENUMERATIONS	63	12.8 UNFORMATTED I/O & BINARY I/O	107
3.2 Advanced variable declaration (Local and	19	7.6 typedef	63	12.9 Checking I/O Status	109
Global)	20	7.7 Bitwise and Shift Operators 7.8 OPERATORs Advanced	64 65	12.10 Random Access 12.11 Customized I/O And Files	110 110
3.3 Constants Advanced 3.4 Variable initialization	20 21	7.8.1 The ternary operator "?:"	65	12.11 Customizeu I/O Anu Files	110
3.5 Type conversion in "Expression" and	21	7.8.2 The Comma Operator :	65		
5.5 Type conversion in Expression and	21				
"Assignment"		7.8.3 More Uses Of Assignment Operator	65	13 Polymorphism. Exceptions. RTTI.	
"Assignment" 3.6 The TYPE CASTS	22	7.8.3 More Uses Of Assignment Operator 7.8.4 The precedence of all C - OPERATORS	65 65	13 Polymorphism, Exceptions, RTTI, Operator cast	
	22			13 Polymorphism, Exceptions, RTTI, Operator cast 13.1 Pointers To Derived Classes	111
	22			Operator cast	111 111
3.6 The TYPE CASTS	22	7.8.4 The precedence of all C - OPERATORS  8 C Preprocessors and Advanced topics		<b>Operator cast</b> 13.1 Pointers To Derived Classes	
3.6 The TYPE CASTS  4 Strings, Arrays & Pointers 4.1 One dimensional Arrays 4.2 USE STRINGS: gets(), 4-string functions,		7.8.4 The precedence of all C - OPERATORS  8 C Preprocessors and Advanced topics 8.1 Advanced #define and #include	65	Operator cast 13.1 Pointers To Derived Classes 13.2 Virtual Functions (VF) 13.3 Abstract class and Pure Virtual function (PVF)	111 113
3.6 The TYPE CASTS  4 Strings, Arrays & Pointers 4.1 One dimensional Arrays 4.2 USE STRINGS: gets(), 4-string functions, atoi(), STRING.H & STDLIB.H	23 24	7.8.4 The precedence of all C - OPERATORS  8 C Preprocessors and Advanced topics 8.1 Advanced #define and #include 8.2 Conditional COMPILATION	65 66 66	Operator cast 13.1 Pointers To Derived Classes 13.2 Virtual Functions (VF) 13.3 Abstract class and Pure Virtual function (PVF) 13.4 Polymorphism: Early binding & Late	111
3.6 The TYPE CASTS  4 Strings, Arrays & Pointers 4.1 One dimensional Arrays 4.2 USE STRINGS: gets(), 4-string functions, atoi(), STRING.H & STDLIB.H 4.3 Create multidimensional Arrays	23 24 25	7.8.4 The precedence of all C - OPERATORS  8 CPreprocessors and Advanced topics 8.1 Advanced #define and #include 8.2 Conditional COMPILATION 8.3 #error, #undef, #line, #pragma	65 66 66 67	Operator cast 13.1 Pointers To Derived Classes 13.2 Virtual Functions (VF) 13.3 Abstract class and Pure Virtual function (PVF) 13.4 Polymorphism: Early binding & Late binding	111 113 114
3.6 The TYPE CASTS  4 Strings, Arrays & Pointers 4.1 One dimensional Arrays 4.2 USE STRINGS: gets(), 4-string functions, atoi(), STRING.H & STDLIB.H 4.3 Create multidimensional Arrays 4.4 Initialize Arrays	23 24 25 25	7.8.4 The precedence of all C - OPERATORS  8 CPreprocessors and Advanced topics 8.1 Advanced #define and #include 8.2 Conditional COMPILATION 8.3 #error, #undef, #line, #pragma 8.4 C's built-in MACROS	65 66 66 67 68	Operator cast 13.1 Pointers To Derived Classes 13.2 Virtual Functions (VF) 13.3 Abstract class and Pure Virtual function (PVF) 13.4 Polymorphism: Early binding & Late binding 13. 5 Generic-Functions & Generic-Classes	111 113
